rahulshyanti37@gmail.com | (+91) 8260910171 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

## Summary

A results-driven Full Stack Developer who excels at engineering robust back-end architecture and intuitive, high-performance user interfaces. Brings hands-on project experience in architecting, developing, and deploying modern, end-to-end web applications.

## Skills

**Programming Languages:** Java, JavaScript, Python

**Web Technologies:** HTML, CSS, Tailwind CSS, React, Node.js, Express.js, REST APIs

**Databases:** MySQL, MongoDB

**Other Skills:** Git, Docker, Data Structures & Algorithms

## Experience

**Web Developer Intern** | PairaLabs Technologies, Bhubaneswar [June 2025 - June 2025]

- Delivered full-stack dashboard functionality by developing interactive React components and creating the necessary Express REST API endpoints for seamless data flow.
- Enhanced application stability and accelerated feature delivery by collaborating within the development team on task management and targeted bug resolution.

**Intern Trainee** | Java Technocrat, Bhubaneswar [Aug 2023 - Sept 2023]

- Developed back-end logic and data-processing scripts using Node.js and Express, and designed, queried, and managed MongoDB databases with optimized CRUD operations and schema design.

## Projects

**CuraLink: Doctor Appointment Scheduling Platform** [Live Application](#) | [GitHub](#)

Tailwind CSS, React, Node.js, Express.js, MongoDB, Razorpay

- Developed and deployed a full-stack doctor appointment platform using the MERN stack, featuring a robust RESTful API and a responsive, real-time scheduling system that allows patients to find doctors, book appointments, and process payments via Razorpay.
- Implemented JWT-based authentication and role-based access control, creating three distinct dashboards for patients, doctors, and admin to manage appointments and platform data.

**GenAura: AI SaaS application** [Live Application](#) | [GitHub](#)

Tailwind CSS, React, Node.js, Express.js, PostgreSQL, Clerk, Cloudinary, AI APIs

- Architected and launched GenAura, a full-stack AI SaaS platform, utilizing a Node.js/Express backend and a serverless Neon PostgreSQL database to ensure high availability and scalability for a suite of production-level generative AI services.
- Developed a dynamic React frontend, integrating multiple AI APIs to deliver a creative suite for article generation, resume review, image creation, and precise background and object removal.

**ResumeCraft: AI-Powered Resume Builder** [Live Application](#) | [GitHub](#)

Tailwind CSS, React, Node.js, Express.js, MongoDB, Gemini API

- Engineered and deployed a full-stack AI Resume Builder on Render using the MERN stack, integrating the Google Gemini API for intelligent content generation and ensuring high availability for a live, production-level service.
- Implemented user-centric features, including secure JWT authentication, dynamic real-time resume preview with fully responsive UI, and export module for multiple ATS-friendly PDF templates.

## Education

**B.Tech in Computer Science and Engineering** | Biju Patnaik University of Technology, Rourkela

2022 - 2026 | CGPA: 7.8/10
