Summary

A results-driven Full Stack Developer who excels at engineering robust back-end architecture and intuitive, high-performance user interfaces. Brings hands-on project experience in architecting, developing, and deploying modern, end-to-end web applications.

Skills

Programming Languages: Java, JavaScript, Python

Web Technologies: HTML, CSS, Tailwind CSS, React, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Other Skills: Git, Docker, Data Structures & Algorithms

Experience

Web Developer Intern | PairaLabs Technologies, Bhubaneswar [June 2025 - June 2025]

- Engineered dynamic front-end components using React to consume REST APIs, successfully fetching and displaying user data to enhance dashboard interactivity.
- Contributed to the back-end by developing and testing REST API endpoints using Node.js and Express, ensuring seamless data retrieval for the client-side application.
- Collaborated closely with the development team on feature implementation, managing tasks and fixing bugs.

Intern Trainee | Java Technocrat, Bhubaneswar [Aug 2023 - Sept 2023]

- Developed backend logic and data processing scripts using Node.js and Express, and worked with MongoDB to design, query, and manage NoSQL databases.
- Gained hands-on experience in schema design, writing optimized queries, and performing CRUD operations for web applications.

Projects

ResumeCraft: AI-Powered Resume Builder [Live Application](#) | [GitHub](#)

HTML, CSS, Tailwind CSS, React, JavaScript, Express.js, MongoDB, Gemini API

- Architected and developed a full-stack AI Resume Builder with the MERN stack, integrating the Google Gemini API for intelligent content generation of summaries and descriptions.
- Implemented user-centric features, including secure JWT authentication, a dynamic real-time resume preview with a fully responsive design, and an export module for multiple ATS-friendly PDF templates.
- Deployed the application on Render, managing the end-to-end lifecycle to ensure high availability for a live, production-level web service.

CuraLink: Doctor Appointment Scheduling Platform [Live Application](#) | [GitHub](#)

HTML, CSS, Tailwind CSS, React, Node.js, Express.js, MongoDB, Stripe API

- Engineered and deployed a comprehensive full-stack web application using the MERN stack to enable patients to find doctors, book appointments, and process payments via Stripe.
- Implemented JWT-based authentication and role-based access control, creating three distinct dashboards for patients, doctors, and administrators to manage appointments and platform data.
- Developed a robust RESTful API with Node.js and Express and built a responsive, real-time scheduling system using React and Tailwind CSS for an intuitive user experience across all devices.

Education

B.Tech in Computer Science and Engineering | Biju Patnaik University of Technology, Rourkela

2022 - 2026 | CGPA: 7.8/10
